CONNECT TO YOUR WORLD

OTICON | **Opn**

Oticon Opn™ connects directly to your smartphone, so you can use your phone like everyone else. Use your hearing aids like stereo headphones to talk on the phone or stream music directly to your hearing aids. Control volume and switch programs with just a tap of your finger.

TV AND MUSIC

Turn your hearing aids into wireless stereo headphones so you can enjoy your favourite programs at the volume you choose.

The TV Adapter connects to almost any audio device using the cables provided. Stereo sound from the TV streams directly to your hearing aids from a range of up to 15 metres.

OTICON ON APP

The Oticon ON App lets you adjust volume, switch programs and check battery level.

The app also offers a convenient “find my hearing aid” search feature, counselling advice and links to user instructions.

Visit oticon.ca to download the app.

Did you know?

Noise-induced hearing loss cannot be reversed.

Hearing health tips:

- Use personal listening devices for less than 60 minutes a day.
- Use cushioned earphones rather than earbuds. Earbuds sit directly in the ears, which can cause more damage.

OPEN UP TO MORE POWER

Oticon Opn™ is available in three performance levels that covers hearing loss from mild to severe-to-profound.

All three members of the Oticon Opn family provide the open sound experience that is proving so popular. However, each model gives the brain a different level of assistance – a different level of BrainHearing™ support.

HOW TO TAKE CARE OF YOUR HEARING AIDS

Hearing aids are manufactured with delicate components and advanced technology. If exposed to heat, chemicals or hard impacts, they may get damaged or work less efficiently.

HARD IMPACTS

When handling your hearing aids, it is a good idea to hold them over a soft surface to avoid damage if you drop them. Put a soft cloth on the table. Keep your hearing aids in their presentation case or in a drying kit when you are not using them.

HEAT

Protect your hearing aids from direct sunlight. Don't leave them near heaters or in your car in the sun. Never put your hearing aids in the microwave, oven or any other heating device to dry them.

CHEMICALS

Cosmetics, hairspray, perfume, aftershave lotion, suntan lotion, insect repellent or eardrops can damage hearing aids. Always remove the hearing aids before applying such products. Allow time for the product to dry before replacing the hearing aids. Remember to clean and dry your hands before touching the hearing aids. Don't use cleaning fluids or solvents to clean your hearing aids – use a dry cloth.

BARLEY, FENNEL AND BEET SALAD

Ingredients:

6 SERVINGS

- 2 cups cooked barley (approx. 2/3 cup dried)
- 1 fennel bulb, thinly sliced
- 2 small golden beets, thinly sliced
- 1/2 small red onion, thinly sliced
- 1/4 cup chopped toasted almonds
- 1/2 cup torn fresh mint
- 1/4 cup olive oil
- 3 tablespoons Sherry vinegar or red wine vinegar
- Kosher salt and freshly ground black pepper

Preparation:

- Toss barley, fennel bulb, beets, red onion, almonds, and mint in a large bowl with oil and vinegar; season with salt and pepper.
- Enjoy a taste of spring!

Did you know?

Untreated hearing loss makes conversations and interactions more difficult. In many cases, this gradually leads to reduced contact with family, friends and colleagues, which can generate feelings of isolation and depression.
